SUBJECT INDEX

Abrasion
a three-dimensional cutting criterion for abrasion, 87
Abrasive wear
the effect of hardness on the transition of the abrasive wear mechanism of steels, 241
fundamental aspects of abrasive wear studied by a new numerical simulation model, 207
predicting synergism between corrosion and abrasive wear, 281
Adhesion
the influence of stacking fault energy and adhesion on the wear of Cu and Al bronze, 171
Alloys
high strain wear mechanisms in ferrous alloys, 155
Aluminium
the influence of stacking fault energy and adhesion on the wear of Cu and Al bronze, 171
wear and friction characteristics of aromatic thiocompounds during aluminium-on-steel sliding contact, 257
Antiwear properties
deterioration of antiwear properties of diesel engine oils during use, 269

Ball-bearings
effect of molecular weight distribution of mineral oils on fatigue life of radial ball-bearings, 293
Bearing materials
new bearing materials for high speed dry operation, 33
stiff and strong bearing materials for high speed dry operation, 51
Bearings
analysis of finite width journal bearings with micropolar fluids, 1
new bearing materials for high speed dry operation, 33
stiff and strong bearing materials for high speed dry operation, 51
Bronze
the influence of stacking fault energy and adhesion on the wear of Cu and Al bronze, 171

Ceramics
transient hot spot temperatures at a sliding ceramic contact including surface coating effects, 59
Coal
the erosion of candidate materials for valves in coal gasification systems, 225
Coatings
transient hot spot temperatures at a sliding ceramic contact including surface coating effects, 59
Contacts
concentrated contact sliding friction and wear behaviour of several ceramics lubricated with a perfluoropolyalkylether at 25 °C, 345
the formation of Fe_3O_4 during unlubricated sliding of 4340 steel under both light and heavy contact pressures, 193
a study of traction in elastohydrodynamic lubrication: experimental and simulated curves for a point contact lubricated by a silicone fluid, 13
transient hot spot temperatures at a sliding ceramic contact including surface coating effects, 59
wear and friction characteristics of aromatic thiocompounds during aluminium-on-steel sliding contact, 257
Copper
the influence of stacking fault energy and adhesion on the wear of Cu and Al bronze, 171
Corrosion
measurement of erosion–corrosion synergism with a slurry wear test apparatus, 127
predicting synergism between corrosion and abrasive wear, 281

Cutting
a three-dimensional cutting criterion for abrasion, 87

Dialkyldithiophosphates
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules", 115
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules" — a reply, 117

Elastohydrodynamic lubrication
determination of stresses in elastohydrodynamically lubricated elements on the basis of measured pressure and temperature distributions, 333
a study of traction in elastohydrodynamic lubrication: experimental and simulated curves for a point contact lubricated by a silicone fluid, 13
Elastic–plastic stress
an elastic–plastic stress analysis of a polymeric subsurface with a thin layer under normal and tangential loading, 355
Erosion
the erosion of candidate materials for valves in coal gasification systems, 225
measurement of erosion–corrosion synergism with a slurry wear test apparatus, 127

Fatigue
effect of molecular weight distribution of mineral oils on fatigue life of radial ball-bearings, 293
Fretting
the effect of quench hardening on the fretting wear of medium carbon steel, 77
Friction
concentrated contact sliding friction and wear behaviour of several ceramics lubricated with a perfluoropolyalkylether at 25 °C, 345
wear and friction characteristics of aromatic thiocompounds during aluminium-on-steel sliding contact, 257

Journal bearings
analysis of finite width journal bearings with micropolar fluids, 1

Lead
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules", 115
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules" — a reply, 117
Lubricants
real time simultaneous in-line wear and lubricant condition monitoring, 303
Lubrication
an investigation of the different regimes of deformation which can occur when a hard wedge slides over a soft surface: the influence of wedge angle, lubrication and prior plastic working of the surface, 97
a study of traction in elastohydrodynamic lubrication: experimental and simulated curves for a point contact lubricated by a silicone fluid, 13

Nitrogen
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules", 115
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules" — a reply, 117

Oils
deterioration of antiwear properties of diesel engine oils during use, 269
effect of molecular weight distribution of mineral oils on fatigue life of radial ball-bearings, 293

Perfluoropolyalkylether
concentrated contact sliding friction and wear behaviour of several ceramics lubricated with a perfluoropolyalkylether at 25 °C, 345
Plastic working
an investigation of the different regimes of deformation which can occur when a hard wedge slides over a soft surface: the influence of wedge angle, lubrication and prior plastic working of the surface, 97
Polymers
an elastic–plastic stress analysis of a polymeric subsurface with a thin layer under normal and tangential loading, 355
tribological behaviour of unfilled and filled poly(amide–imide) copolymer, 143

Silicones
a study of traction in elastohydrodynamic lubrication: experimental and simulated curves for a point contact lubricated by a silicone fluid, 13
Simulation
fundamental aspects of abrasive wear studied by a new numerical simulation model, 207
Sliding
concentrated contact sliding friction and wear behaviour of several ceramics lubricated with a perfluoropolyalkylether at 25 °C, 345
the formation of Fe_3O_4 during unlubricated sliding of 4340 steel under both light and heavy contact pressures, 193
an investigation of the different regimes of deformation which can occur when a hard wedge slides over a soft surface: the influence of wedge angle, lubrication and prior plastic working of the surface, 97
transient hot spot temperatures at a sliding ceramic contact including surface coating effects, 59
wear and friction characteristics of aromatic thiocompounds during aluminium-on-steel sliding contact, 257
Sliding wear
the unlubricated reciprocating sliding wear of a martensitic stainless steel in air and CO_2 between 20 and 300 °C, 313
Stainless steels
the unlubricated reciprocating sliding wear of a martensitic stainless steel in air and CO_2 between 20 and 300 °C, 313
Steels
the effect of hardness on the transition of the abrasive wear mechanism of steels, 241
the effect of quench hardening on the fretting wear of medium carbon steel, 77
the formation of Fe_3O_4 during unlubricated sliding of 4340 steel under both light and heavy contact pressures, 193
wear and friction characteristics of aromatic thiocompounds during aluminium-on-steel sliding contact, 257
Surfaces
an investigation of the different regimes of deformation which can occur when a hard wedge slides over a soft surface: the influence of wedge angle, lubrication and prior plastic working of the surface, 97
transient hot spot temperatures at a sliding ceramic contact including surface coating effects, 59

Thermogravimetric analysis
comments on "Thermogravimetric analysis of Zn and Pb bis (O,O'-dialkyldithiophosphates) and their complexes with nitrogen donor molecules", 115
comments on "Thermogravimetric analysis of Zn and Pb bis (O,O'-dialkyldithiophosphates) and their complexes with nitrogen donor molecules" — a reply, 117
Traction
a study of traction in elastohydrodynamic lubrication: experimental

and simulated curves for a point contact lubricated by a silicone fluid, 13
Tribology
tribological behaviour of unfilled and filled poly(amide–imide) copolymer, 143

Wear
concentrated contact sliding friction and wear behaviour of several ceramics lubricated with a perfluoropolyalkylether at 25 °C, 345
the effect of hardness on the transition of the abrasive wear mechanism of steels, 241
the effect of quench hardening on the fretting wear of medium carbon steel, 77
fundamental aspects of abrasive wear studied by a new numerical simulation model, 207
high strain wear mechanisms in ferrous alloys, 155
the influence of stacking fault energy and adhesion on the wear of Cu and Al bronze, 171
measurement of erosion–corrosion synergism with a slurry wear test apparatus, 127
real time simultaneous in-line wear and lubricant condition monitoring, 303
the unlubricated reciprocating sliding wear of a martensitic stainless steel in air and CO_2 between 20 and 300 °C, 313
wear and friction characteristics of aromatic thiocompounds during aluminium-on-steel sliding contact, 257

Zinc
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules", 115
comments on "Thermogravimetric analysis of Zn and Pb bis (*O,O'*-dialkyldithiophosphates) and their complexes with nitrogen donor molecules" — a reply, 117
